Falcon the stories

Faro Faros had a good childhood with his mother, father and elder brother. That was when he was a normal being. Then one day his parents died in a fatal collision while traveling to meet up with Faro's sick grandfather.

His elder brother went missing the very next day and Faros was on his own. Till his grandfather soon recovered his health and came to take care of Faro. Faro grew up studying archeology. It was his passion to find the story of the past in the soils he dug up, it was a hobby turned profession.

Then his grandfather died and while burying him Faro discovered a magic chest. He knew it was magical because as soon as he touched the chest it glowed with a neon blue light.

The family of Faro Faros

Father Cal Faros was a structural engineer at the DEC Defense Enforcement Centers at tundarr city.

Mother Angal Faros was a school teacher in an elementary school at tundarr city.

Elder brother Flint Faros was not such a good boy as Faro so he got into a lot of trouble in school and at home. He ran away from home one day after he accidentally shot and killed a DEC officer in the streets of tundarr city.

He has not been found ever since, he was only 11 years old when he ran away from home.

Not reporting this to anyone he took the chest straight to his college professor Wildu Walf. Prof Wildu immediately recognized the magical chest as he was teaching about the very same object in a class earlier that day. It was the chest of King Falco.

The Chest

The chest itself is made of hollow material, or material that does not exist as a matter.

Hence the name magic chest. The chest protects the ring and the crest. The chest calls back the ring and the crest to itself and locks down and bury itself in case of the death of its present bearer. It basically safe keeps the power of falcon. Only a dwarf belonging to the fairy of falcon can carry it around looking for its rightful bearer in case of a sudden need to defeat powerful evil forces.

King Falco was a king of a kingdom that existed 200 years ago. He was an honest and just king. He would serve his people with dignity and utmost care. One day as he was riding his horse in the forest of Thunda, a dwarf appeared in front of him and presented him with a magical chest. This chest would enhance the king's ability to do more good deeds and defeat evil that existed. The chest contained a power ring with the symbol of the bird falcon, a power bracelet and a power crest to be used by wearing in the chest.

King FALCO was soon called King Falcon the savior. He would use the power to help people in need and defeat evil men wherever they would appear. things in the kingdom were well and people were living a good and peaceful life.

King Falco was soon called King Falcon the savior. He would use the power to help people in need and defeat evil men wherever they would appear. Thing's in the kingdom was well and people were living a good and peaceful life. Till one day an evil man named Murda Dag came to the kingdom. He had heard of the power of the magical chest and wanted to steal it to use it for evil deeds.

He found King Falcon and confronted him and the battle was fierce, the king was defeated and Murda Dag got hold of the magic chest. He tried to put on the power ring and the power chest but as soon as he did, it burned him bad. The chest was made to serve good and good only. If evil did try to use it the powers would counter attack the user.

The kingdom people never did see whatever happened to the magic chest after the death of King Falco and the defeat of Murda Dag. Some believe the same dwarf who gave the chest to the king must have taken it back with him.

Until Faro Faros discovered it again. But that was no accident and the magic chest was no toy, so the good Prof Wildu helped Faros learn how to control the immense power of the magic chest, and soon Faros was ready to be the next Falcon.

Professor Wildu

Prof Wildu Warf trained Faro Faros good. As he already was an expert in the science of the powers of Falcon, and other historical artifacts, he knew exactly how to utilize the powers and the capabilities of the ring, the crest and the chest itself.

The Ring

The ring is made out of pure gold with a sapphire stone encrusted on it, in which the symbol of a falcon bird flying is imprinted inside. The ring only works for good deeds only, it has the ability to detect the wearer or bearers heart and intentions and act accordingly. The better the state of intent the stronger the power. The will of one's heart also directs the rings power energy. The power, which is similar to a laser beam, can take shapes and forms when needed. The mind of the ring bearer imagines what the ring power will do at any given time. The ring cannot harm good people with wise hearts. It does not allow any mistakes. The power beam can also help lift loads, other people and contain water or fire with its protective power beam ball formations. When the ring bearer reaches the highest level of ring control, the ring allows the power of flight to be used.

The Crest

The crest is to be worn on the chest of the ring bearer. The crest will not work if it is not worn together with the ring. The crest covers the ring bearer with a protective power suit, to be utilized while flying into space or going deep underwater. The suit which forms from the crest allows the ring bearer to breath in space or deep ocean waters. It also acts as a protection against the elements of the planet, space and deep sea creatures. In addition it multiples the rings strength by ten times!
